What can Filtration Provide for You?

- A single source of supply
- Customer stock management systems
- Customised fleet catalogues
- Technical support
- Nationwide distribution
- Manufactured to the OE Standard from OE source
- Donaldson exhaust systems and accessories

Original Equipment Manufacturers

- Authorised supplier of Donaldson to the OE Market in UK
- Work with design engineers across a multitude of industries
- Provide full technical support services

Quality, Service, Technical Knowledge

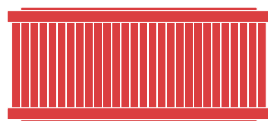

Fuel Filtration

Changes in emission regulations have driven significant changes for current and future diesel injection systems. The increased fuel system operating pressure requires reduced component clearances in the order of 2-4 micron thereby placing a higher demand on fuel cleanliness. Filtration Ltd are able to supply Donaldson's bulk filtration solutions to meet this requirements.

Some of Our Principal Suppliers

Donaldson[®]
FILTRATION SOLUTIONS
